

Page not found (404)

Request Method: GET

Request URL: http://localhost:8000/

Using the URLconf defined in `AAMS.urls`, Django tried these URL patterns, in this order:

1. `admin/`
2. `Root/`
3. `api/schema/` [`name='schema'`]
4. `api/schema/swagger-ui/` [`name='swagger-ui'`]
5. `api/v1/`
6. `AAMS/`

The empty path didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.
